

# VIBROPRESSES SERIES Fi 50

## PRODUCT DESCRIPTION

Versatile machine for production of all types of products with height from 4 cm to 25 cm.

### Standard:

Structure made with one-piece steel sheets.

Less vibrations with frequency variation.

### Optional:

Double feeding.

### Description

Vibropress ideal for companies starting out in the sector of concrete products production. Simple and reliable mechanics. The constructive quality is the same as superior-category vibropresses; solid, accurate and versatile, it can be easily incorporated in a wide range of automations.

## TECHNICAL CHARACTERISTICS

Face-mix:	no (optional)
Table dimensions	1,200x600 H 40 mm
Product height:	40 ÷ 250
Weight (vibropress):	7,800 / 9,000 kg
*Hollow blocks: 20x40 H 20 cm:	No. pieces 7,200 (100%/8h)
*Paver: 10x20 H 6 cm	m2 720 (100%/8h)
*Paver face-mix: 10x20 H 6 cm	m2 600 (100%/8h)

\* In semi-automatic systems, productivity depends on the personnel's efficiency. Variable theoretical capacity and productivity values based on adjustment of the vibropress, on the aggregate and on the product geometry. The machine speed and the product quality are based on materials selected by Form Impianti. Walls of the blocks <= 30 mm.
